

Article number	461C014
Article designation	Sealing section

This sealing section is made of silicone and has a steel insert. Because of the high bending radius of this sealing profile, it is easy to bend around corners. The profile is easy to fasten and has two functions: protecting from sharp edges and sealing. This protector is often used in food industries or in industries where silicone is required. It is temperature resistant from -60°C up to $+180^{\circ}\text{C}$. It can briefly resist temperatures of 200°C .

General information

Assembly profile	Silicone
Assembly sealing lip	Silicone
Assembly insert	Steel 1.0347
Clamping range	Bespoke clamping range from 1-5 mm
Colour	Black

Directives

Reach	Compliant
RoHS - RL 2002/95/EG (EC)	Compliant
Altauto - RL 2000/53/EG (EC)	Compliant
